Commercial cylinders, pumps, and valves

Parker/Commercial Hydraulic gear pumps are available in single, multiple, piggyback and thru-drive assemblies. They manufacture hydraulic components for a wide range of industries including:

- Construction
- Refuse/Dump Truck
- Material Handling
- Forestry
- Agriculture
- Industrial

Parker/Commercial cylinders come in a complete line of telescopic and single stage (rod) cylinders. They are highly engineered to extend product life and reduce machine life cycle costs. They bore up to 15" (380mm) and strokes up to 500" (12700mm). Standardized designs for quick delivery and reliable quality. Custom designs are available to address specific performance requirements.
